

Roger Albuquerque

Fullstack Developer

✉ rogeralbuquerque284@gmail.com ·  [RogerAlbuquerque](#) ·  [Roger Albuquerque](#)

Address: Roger de Oliveira Albuquerque – Barra do Corda – MA - Brazil

Summary

Full Stack Developer with 5+ of experience building scalable web applications using **JavaScript, React.js, Next.js, Node.js** and **TypeScript**. Strong experience in **REST APIs** development, scalable frontend interfaces, clean architecture. Focused on performance, maintainability, and best engineering practices including SOLID principles, automated testing, and containerization with Docker.

Experience

E-commerce-sandbox

Apr 2025

- Designed and implemented a responsive e-commerce frontend using Next.js and Tailwind, reducing initial load time by 80% through optimized component rendering and CSS improvements.
- I optimized CRUD endpoints to support 1,000+ simultaneous virtual users in high-contentment scenarios, using k6 to performance monitoring.
- Designed front-end interface with **Next.js** and **Tailwind**, improving user experience and performance, in addition to optimizing the page's CSS styling speed.
- Used **TypeScript** throughout the frontend to improve type safety and maintainability.
- Created backend with **C#, ASP.NET**, and **Entity Framework** for order processing and product management.
- Configured a **MySQL** database for data persistence and integrated it with the Rest API using **Entity Framework Core**.
- Used some Design Patterns like dependency injection for better application scalability.
- Employed **Docker** and **Kubernetes** to maintain consistency between development and production environments.

ApiCatalog

Jul 2024

- Developed a web service in **ASP.NET Core** for product catalog and category management, supporting CRUD operations upon receiving JSON, pagination, and authentication via JWT,
- Designed a layered architecture (Controller-Service-Repository) applying SOLID principles, DTO mapping, and Unit of Work to ensure clean separation of concerns and maintainability.
- Structured the application using **Repository Pattern** and **Unit of Work**, implementing **DTOs** and layer separation following the **MVC** model to facilitate maintenance and scalability.
- Configured integration with **MySQL** databases using **Entity Framework Core 8/9**, ensuring efficient and secure data persistence.
- Implemented interactive documentation with **Swagger** and asynchronous programming (async/await) in critical endpoints, optimizing performance and customer experience.
- Developed unit tests with **xUnit**, ensuring functionality coverage and system reliability.
- Ensured clean and modular code, following good architecture and design practices, with a focus on performance and maintainability.

HairApp

Oct 2023

- Co-developed a booking system where I was responsible for backend architecture and authentication flows using Node.js and MongoDB.
- Developed an administrative panel for barbers to manage appointments, confirm availability, and update client status in real-time.
- Integrated secure authentication and user management with encrypted passwords and session management.
- Created the backend using **Node.js** and **MongoDB** for efficient data storage and retrieval.
- Focused on clean architecture, scalability, and a smooth user experience, both on the client and administrator interfaces.

Education

Technologist Degree in Systems Analysis and Development

FACIMP WYDEN – Brazil (2021–2024)

Skills

- **Frontend:** HTML, CSS, Javascript, ReactJs, Next.js, TypeScript, Angular, UI / UX
- **Backend:** C#, ASP.NET, ORM Entity Framework, RESTful APIs, SQLServer, MySQL, MongoDB, Unit tests, xUnit
- **DevOps:** Docker, Kubernetes, Azure (basic), AWS (basic)
- **Tools:** Git, GitHub
- **Methodologies:** SOLID, Clean Code, Kanban, Testing
- **Soft Skills:** Quick learner, communication, good teamwork, highly motivated, creative, digital artist

Courses

- Web API ASP .NET Core Essencial Course (.NET 8 / .NET 9) - Udemy
- Complete Web Development - Udemy
